Position Enterprise Business Continuity Director

Location Jersey City, NJ

Job Description

Will help manage the business continuity program to ensure business continuity plans conform to the Enterprise Business Continuity policy, procedures, and standards. Oversee the areas of governance, development, implementation, and monitoring for the business continuity program. Analyzes business needs based on the business impact analysis to ensure business recovery and identify any gaps within the recovery strategy. Provide program training, administer a business impact analysis, and effectively communicate to others within the area or business unit with they are responsible. Maintain compliance and assurance records, provide oversight for plan testing, score carding and reporting, and testing log maintenance. Supports Business Continuity management during events, incidents, and disasters. Also provide monthly reporting to Enterprise Business Continuity management on a monthly basis. For a product and technology solutions provider focused on innovation and operational excellence. Assist in the development, implementation, testing, education and maintenance of global Business Continuity programs across all departments to ensure business recovery in the event of an emergency or disaster.
