

***EUKOR Car Carriers Inc.***

*We deliver*

EUKOR Car Carriers Inc. is among the world's largest shipping companies specialized in transporting automobiles and other rolling cargo. We proudly deliver tailor-made ocean transportation and logistics services of the highest quality to the global automotive industry. We are looking for

## **Vessel / Voyage Operator**

**Work Place:** EUKOR North America office, Parsippany, USA

### **Role description:**

- Ensure optimal planning and execution of the overall operation of vessels in trades of North America region with the objective of maximizing efficiency and profit for EUKOR
- Ensure optimal planning of coastal passage to optimize trade-offs between cost and non-steaming time

### **Responsibilities:**

- Overall responsible for cargo and voyage cost related to schedule (overtime, port cost, speed & bunker etc...).
- Optimize vessel/voyage costs prior and during voyage in coordination with Trade and any other relevant parties including but not limited to agents and port personnel.
- Create realistic and reliable schedules for the trade, at lowest cost and given commercial restrictions
  - Continuously review and coordinate schedule with main stakeholders: Trade, Ports and Vessel masters
- Monitor Stevedore performance
- Improve cargo care and damage prevention in Central America, Caribbean Sea & USEC
- Ensure subcontractors operate according to the requirements set forth by EUKOR
- Plan loading / discharging operations of vessels operating in Central America, Caribbean Sea & USEC
- Supervise vessel/cargo operations when required to ensure compliance with EUKOR quality standards
- Create stowage plans for cargo loading on vessels in North America, Central America & Caribbean Region and distribute final plans to vessels, ports of discharge and relevant parties
- Monitor, develop and maintain the standards and procedures used to survey and handle cargo
- Initiate corrective actions when quality requirements are not met
- Monitor major damages and follow up on action plans to prevent future occurrences
- Closely monitor maritime rules and regulations which may have an effect on EUKOR business and provide feedback to all parties within EUKOR North America and Seoul
- Post Voyage Analysis – drive continuous improvement
- In any event of vessel / cargo accidents and/or abnormal situations in ports, managing the situation and reporting to relevant parties
- Checking the feasibility at potential different ports/berths with this regions of control and provide cost analysis when requires
